

Briefing Norse Style attack map

Igor van Gemert

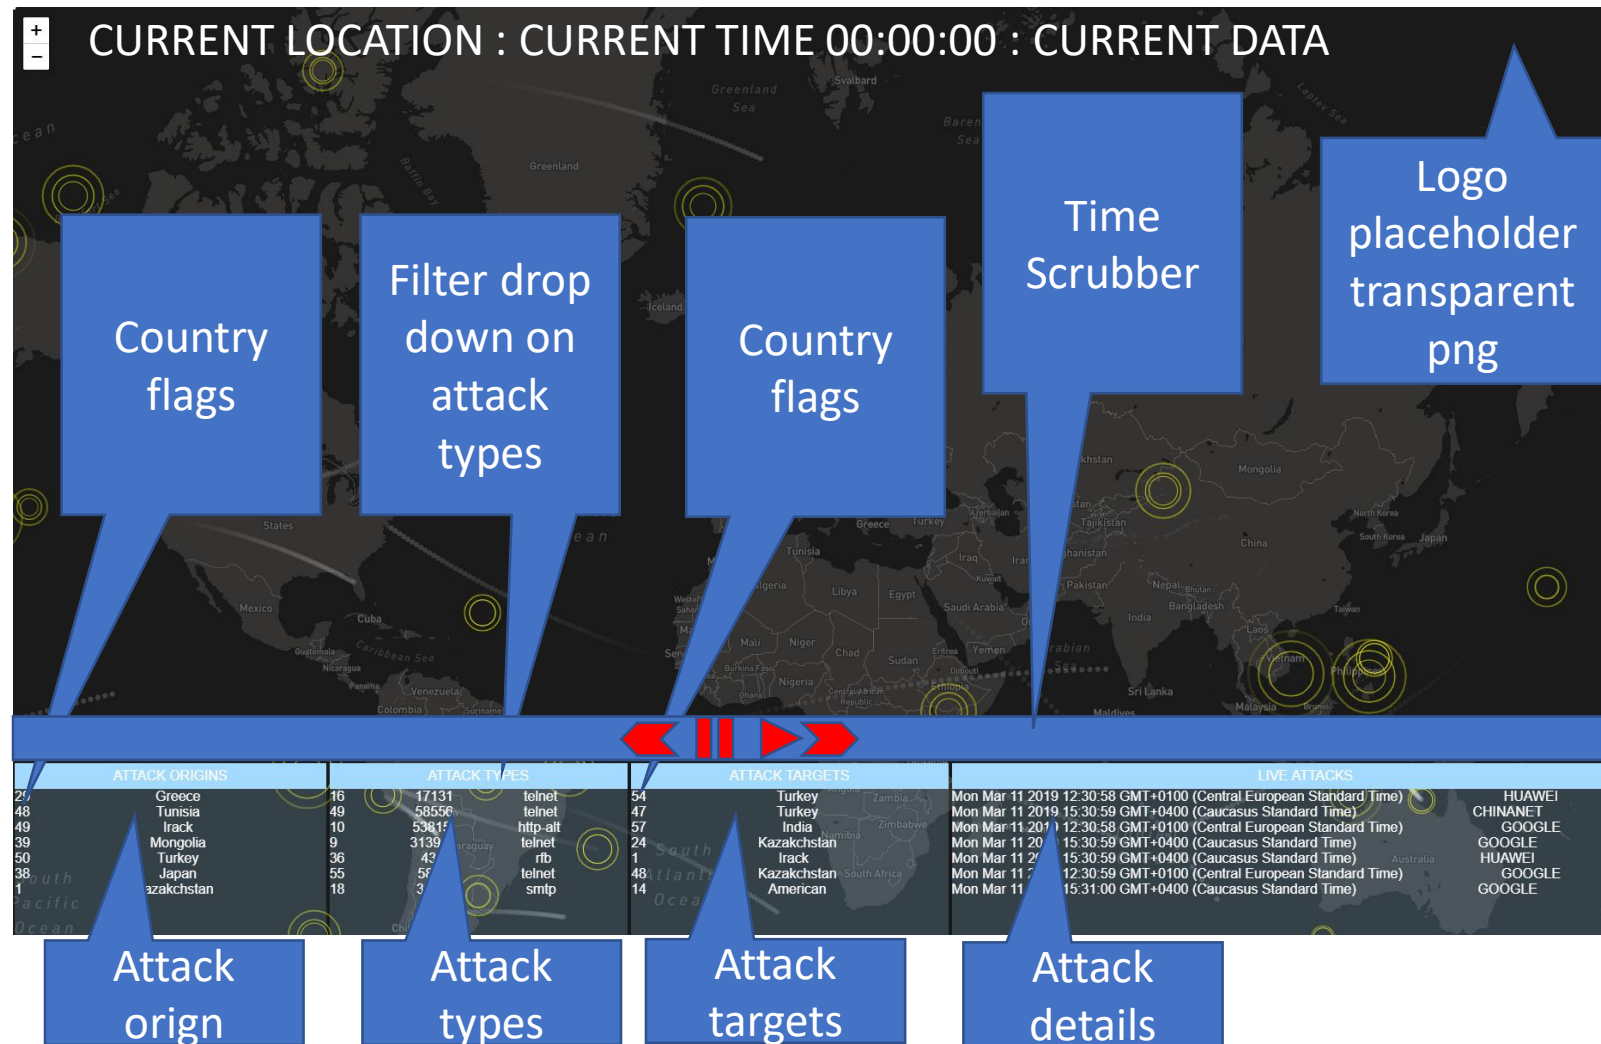

Introduction

- Based on our previous version we would like to add some more functionality and graphic styling requirements
- This document is basic but required for further development and it's organic.

Current status dd 11-03-2019 ist

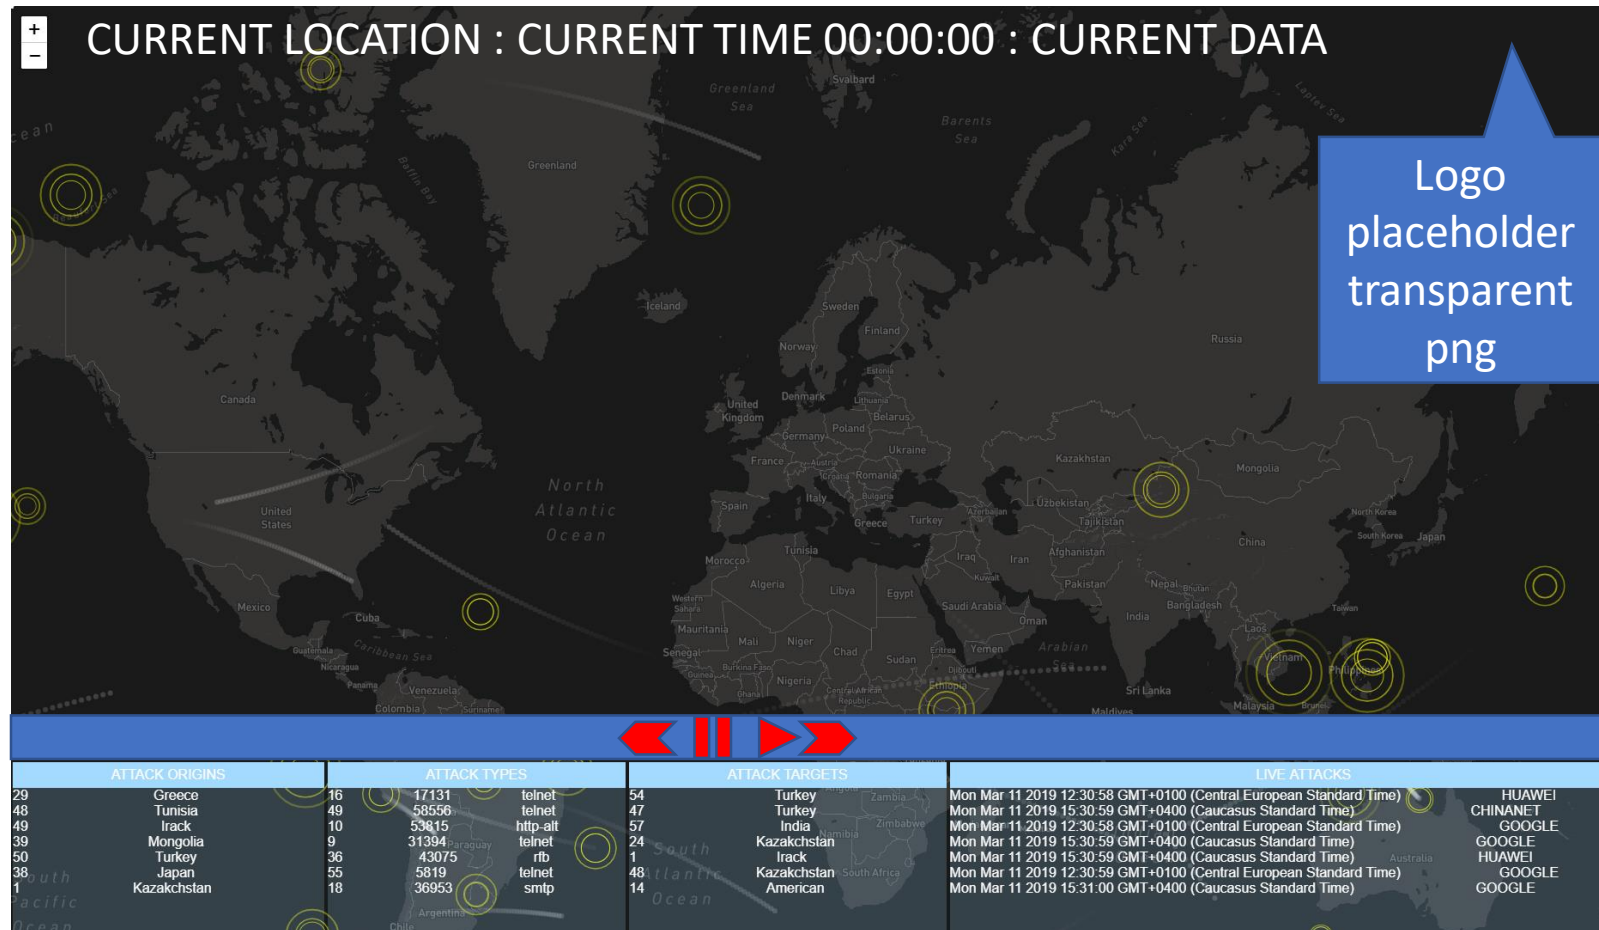

Current status d.d. 11-03-2019 soll

- Add logo (for user ID oauth framework)
- Zoom to region and fix and search box city region
- Pan between windows (region fix 1 fix 2 fix 3 and cycle interval)
- Filter events
- Report events to RSS feed mail
- Set trigger events/alerts
- Add timeline and event slider.
- Add scraper based on other detail maps (we research the legal implications, in other words we will not copy it but will enhance it with more contextual information.
- Filter on industry attack type
- Display industry/company news in segment.

Soll v2 Analysis triggered by voice agent

- Show me the attack from data range where attacktype is DDOS
- Compare attack on data range with data range
- Etc
- Basically an attack analysis toolkit to understand the volume and economic effects of these attacks

To build animations from scratch... why ;)
